ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: FOLD IN FLOOR SEAT ASSEMBLY HAVING RETRACTING FRONT LEG LINKAGE ASSEMBLY

(57) Abstract: A seat assembly includes a seat cushion and a pivotally attached seat back movable between a seating position secured to the floor of a vehicle and a stowed position recessed in the floor. A pair of front legs are pivotally attached to the seat cushion and removably attached to a striker assembly in a floor. A pair of rear legs are attached between the seat cushion and the floor. A linkage assembly is coupled between the front legs and rear legs. The linkage assembly includes a lost motion slot for retracting the front legs relative to the seat cushion frame allowing the front legs to pivot between a support position extending between the seat cushion and the floor and a retracted position recess against the seat cushion in response to pivotal movement of the seat cushion between the seating position and the stowed position.
